

LabRoots unique data mining technology connects you to only the most qualified scientists for your positions.

Post a Job  
today  
only \$175 for  
30 days

- Reach scientists who are not actively job hunting
- Automatic matching with, and display to qualified scientists

LabRoots' jobs feature uses data mining technology so that relevant jobs will post to each users home page – benefitting not only recruiter who posts the job, but also the scientists. Unlike traditional job boards, LabRoots will display your ad to qualified candidates who are not actively looking for a job. This is can be critical when you are looking for someone with specific skills or experience. Additionally, an advanced search tool is available for users who want to view jobs throughout the various science disciplines.

- When a user finds a job of interest, they can apply directly from LabRoots. The user may:
- Manually complete the application
- Submit a resume, or
- Upload their LabRoots profile (the LabRoots profile can be easily exported as a resume document)
