SHARING MULTIPLEX SOLUTIONS

| Date   | Time             | Track | Presentation Title                                                                                           | Speaker                                                                                                                                                                                                                                                       |
|--------|------------------|-------|--------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1-Oct  | 08:00 - 09:00 AM |       | Advancing Biomarker Analysis with Luminex xMAP® Technology: A Versatile Platform for Multiplexing Innovation | Sherry Dunbar, PhD, MBA<br>Senior Director, Scientific Affairs Programs, Diasorin                                                                                                                                                                             |
| 8-Oct  | 08:00 - 09:00 AM |       | Development and Validation of Luminex Assays for Use in Pre-Clinical and Clinical Sample Testing             | Laurie Stephen, PhD<br>President, Ampersand Biosciences                                                                                                                                                                                                       |
| 15-Oct | 08:00 - 09:00 AM |       | Integrated quality control processes for cell therapy workflows using automated solutions                    | Nicholas Putnam<br>Scientist, R&D Workflow Applications, Thermo Fisher Scientific                                                                                                                                                                             |
| 22-Oct | 08:00 - 09:00 AM |       | The Role of Multiplex Assays in Cancer Detection                                                             | Charles J. Rosser, MD, MBA, FACS<br>Founder, Chief Executive Officer, Chief Medical Officer, and Board of Trustees Chair, Nonagen Bioscience<br>Jim Rivard, MS<br>Scientist, Bio-Techne<br>Daniel Austing<br>Senior Product Manager, Bio-Techne               |
| 29-Oct | 08:00 - 09:00 AM |       | Novel Multiplex Diagnostic Assays for Serology                                                               | Holly Ahern, MS, MT(ASCP)<br>Chief Scientific Officer, Aces Diagnostics Inc.<br>Jason L. Liggett, PhD<br>Chief Scientific Officer, New Day Diagnostics                                                                                                        |
| 5-Nov  | 08:00 - 09:00 AM |       | ABO-Histocompatibility: New Tools to Drive Innovation in Transplantation                                     | Anne Halpin<br>HLA Director, Transplant Laboratory, Alberta Precision Laboratories, University of Alberta Hospital<br>Lori West<br>Professor of Pediatrics, Surgery, Medical Microbiology/Immunology and Laboratory Medicine/Pathology, University of Alberta |
| 12-Nov | 08:00 - 09:00 AM |       | Getting the Most Out of Multiplexing                                                                         | Dequina Nicholas, PhD<br>Assistant Professor, Department of Molecular Biology and Biochemistry, UC Irvine                                                                                                                                                     |

|        |                        |  |                                                                                                                           |                                                                                                               |
|--------|------------------------|--|---------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| 19-Nov | 08:00 -<br>09:00<br>AM |  | Development of a Multi-biomarker Prognostic Risk Score for<br>Idiopathic Pulmonary Fibrosis (IPF) Based on Serum Proteins | Peter Schafer, PhD<br>Chair, Prognostic Lung Fibrosis Consortium (PROLIFIC),<br>Pulmonary Fibrosis Foundation |
